

To whom it may concern,

It is a pleasure to recommend Piyarach Muenchana, who currently serves as the Cloud Department lead here at ABR Hosting LTD. Having worked closely with Piyarach, I have seen firsthand how they have evolved from maintaining systems here to architecting the future of our infrastructure.

In their role as Lead, Piyarach manages the technological backbone of our company infrastructure both for in-house systems and for developing services that hundreds of clients use everyday to keep their businesses running. Their expertise spans the entire range of our services. Their quick promotion from cloud tech to department lead speaks volumes of their expertise, people skills and deep industry knowledge.

Piyarach is responsible for high-level planning and deployment of both our core and edge infrastructure. They have a rare ability to see the “big picture” in regards to service demand, possible use cases and unique selling points that elevate a product and set solutions aside from competitors. Their ability to create scalable and modern solutions that elevate our service offerings and improve client usability and satisfaction has been monumental in our business’ growth.

Beyond core hardware and edge nodes, they have built a culture of technical rigor within their department; using their unique gift of translation complex infrastructure into actionable goals that greatly speed up development and deployment times and provide a massive boost in team productivity.

Piyarach is one of those rare team leads who is just as comfortable aiding in high-level business decisions and guiding company direction as they are troubleshooting a complex deployment script. Their skillset would be a significant gain for any organisation, just as it has been a cornerstone to our success at ABR Hosting.

I can honestly recommend them without reservation. Please feel free to contact me at: alex.brand@abrhosting.com if you require any further insight into their tenure with us.

Best Regards,

Alex Brand
Company Director
ABR Hosting LTD
